- **Adama Science and Technology University (ASTU)**
  Bachelor of Science in Software Engineering
  Expected Graduation: 2026

Extracurriculars

- Founder: ASTU Classic & ASTU Classic Tutorial YouTube Channels
- Member: CSEC ASTU (Hackathons & Challenges)
- Volunteer Peer Mentor for junior students

Professional Summary

Full Stack Developer and Software Engineering student at ASTU with hands-on experience building role-based systems and AI automation projects. Skilled in front-end and back-end development, database design, and scalable web applications. Seeking full-time opportunities in software development where I can apply my technical skills and problem-solving abilities.

Experience

Software Developer | Gondar University
2024 – Present

- Built role-based systems, including a Complaint Management platform with real-time notifications, tracking, and escalation.
- Developed backend APIs, authentication, and databases.
- Improved security, usability, and workflow efficiency.

Software Intern | ASTU Development Team
2023 – 2024

- Supported front-end and back-end development for the student portal and management systems.
- Assisted in testing, debugging, and performance improvements.
- Gained hands-on full stack development experience.

Projects

ASTU Info System
- Built a comprehensive system for students, staff, and administrators; handled backend, APIs, and responsive UI.

Student Portal & Management System
- Developed a multi-role system with authentication, course tracking, and student record management.

Gondar Complaint Management System (CMS)
- Created a secure login system with real-time tracking and optimized performance for efficient issue resolution.
